The Reading Ability of U.S. Students & My Location

The Reading Demands of U.S. Textbooks & My Location

Interpretive Guide for Lexile® Measure

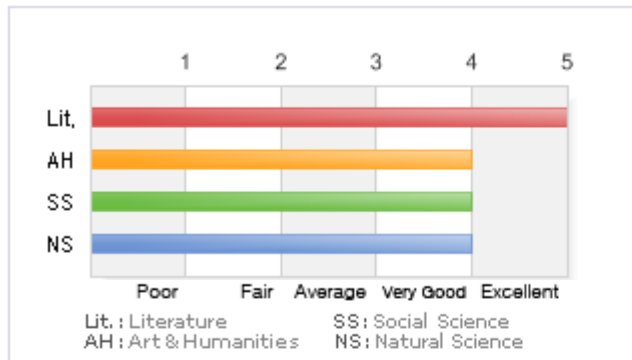

What is a Lexile® measure?

- + A Lexile® measure is a numerical metric assigned to both readers and texts based on The Lexile® Framework for Reading. The Lexile® measure of a reader describes his/her English reading ability, while the Lexile® measure of an English-language text indicates its difficulty.
- + Both Lexile® reader measures and Lexile® text measures are reported on the same Lexile® scale and can range from below 200L to above 1700L.

How much public credibility does a Lexile® measure hold?

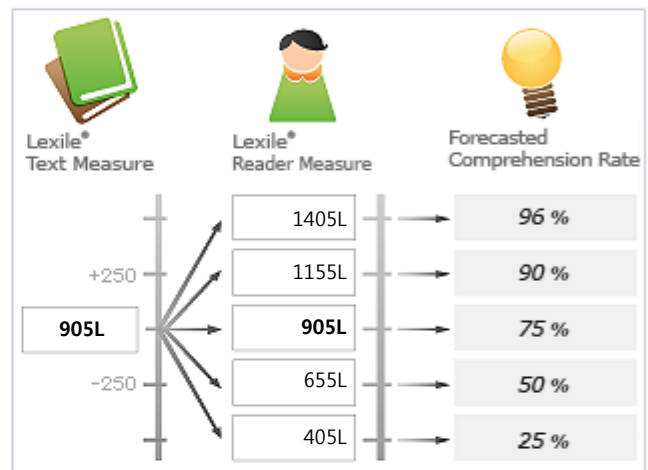

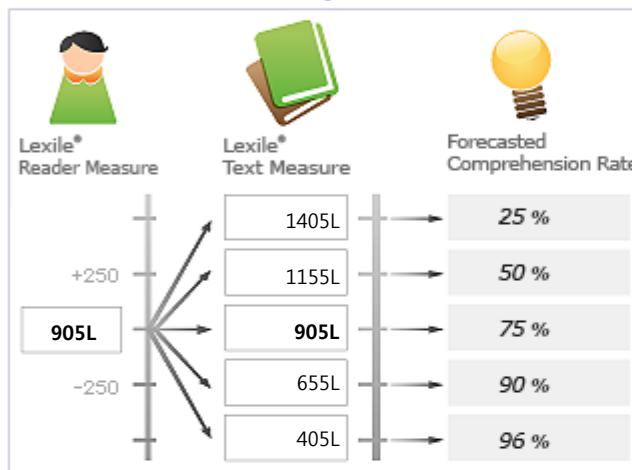

- + A Lexile® measure is the most widely used English reading metric in the U.S., with more than half of U.S. students receiving a Lexile® measure from a reading assessment or program.
- + Each year, tens of millions of students worldwide receive a Lexile® measure. More than 150 publishers account for the tens of thousands of English books that have Lexile® measures.

My Field Achievements

- + E-LQ Assessment evaluates English reading ability in 4 fields of content areas; literature, art & humanities, social sciences, and natural sciences.
- + Based on the results of your Field Achievements, you can accurately estimate your current reading tendency and make future plans in terms of setting new directions and strategies for reading.
- + A balanced reading improves your reading ability, as well as implants confidence in learning and provides occasions for discovering latent potentials.
- + The evaluation of the Field Achievements is based on the 5-level evaluation scale; excellent, very good, average, fair, and poor.

Forecasted Comprehension Rate for Various Readers & Texts

Practical Guide in Applying Lexile® Measures

The most effective way to improve your English reading ability is to read books within your Lexile® range.

- + When you read a book within your recommended Lexile® range (-100L~+50L), the forecasted comprehension rate by default is set around 75% (65%~85%).
- + 75% forecasted comprehension rate is the optimal condition for reading, where you are not bored by the demand of the text nor experience too much challenge from the reading.
- + If the difficulty of the text is too high compared to your reading ability, you may lose confidence in reading all together because the book is too difficult.
- + On the contrary, if the reading demand of a text is too low, you may be able to read it with ease but will not experience the challenge necessary to strengthen your reading skills.

A Lexile® measure can be effectively used even when reading instructions are off-target to the Lexile® range.

- + The value of a Lexile® measure is to "personalize reading" for students with varying levels of English reading ability.
- + For students who tend to show underachievement, it might be necessary to encourage them with readings that are less challenging than the 'targeted reading' level.
- + At other times, such as when a student is highly motivated by a book's topic, it might be necessary to strategically challenge the student to read a book even if its reading demand exceeds his/her reading ability.

4-Step Application of the E-LQ Assessment

1 Taking E-LQ test

E-LQ test uses The Lexile® Framework for Reading to determine your precise Lexile® measure and to compare your reading ability to native English-speaking students.

2 Knowing My Lexile® Measure

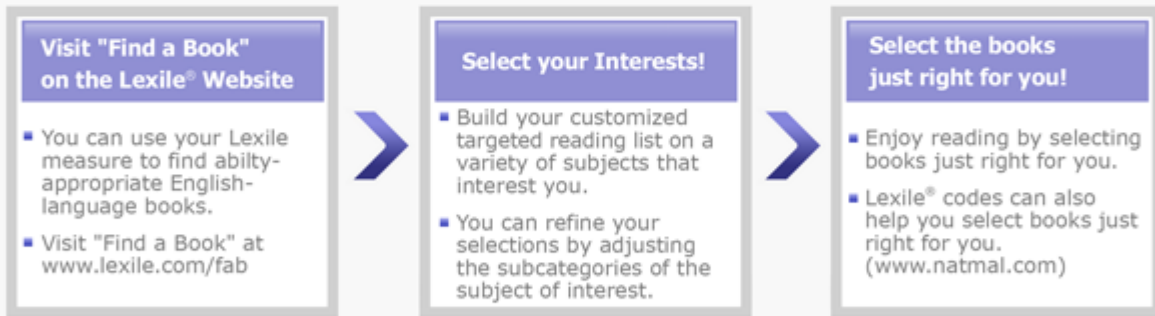

The current phase of learning your Lexile® measure along with your field achievements through the E-LQ Test.

3 Finding the Right Books

The next step you take is to use the "Find a Book" search tool on the Lexile® Website to choose the right books for a "targeted reading" experience within your areas of interest.

A targeted reading experience occurs when you read a book within your Lexile® range (-100L~+50L), showing approximately 75% comprehension rate. Books within your Lexile® range should not be too easy to be boring, nor too difficult to be frustrating.

4 Strategic & Effective Reading

The final step of setting up goals for reading along with practicing your reading strategically in an effective way according to the goal(s).
